CIS HEAVY TRANSPORT

SEPARATIST SUPPLY SHIP

With the ever-increasing requirements of the Separatist Alliance threatening to stretch its already refitted fleet to breaking point, the need for more suitable transport craft was evident. Enter the Separatist Supply Ship, a vast craft capable of deploying troops, ground assault vehicles and equipment directly to the theatre of war.

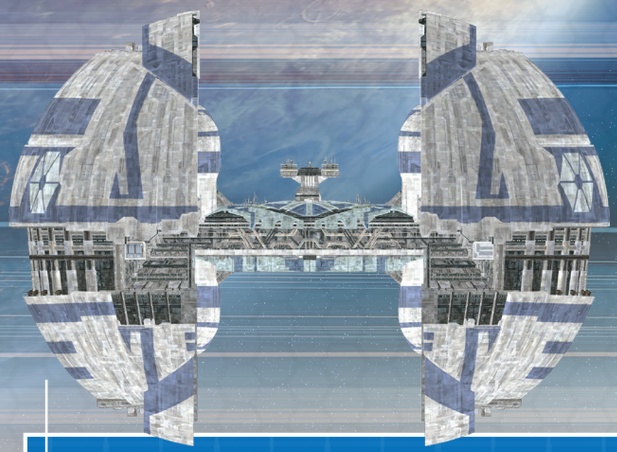

With the demands put upon the armies of the Separatist movement increasing as the Clone Wars spread across the galaxy, the ability to conduct large-scale military deployments became paramount. Retrofitting the shell of what was originally a corporate vessel, the Confederacy of Independent Systems created the Separatist Supply Ship and added it to their fleet. With a capacity far outstripping any other heavy transport starship, the new vessel soon became an invaluable link in an ever-strengthening chain that was steadily throttling the Republic.

When the Clone Wars began to stretch the fleet of the Separatists, which was made up largely of refitted trade vessels, a new, more battle-ready craft was developed. Crewed entirely by droids, the Separatist Supply Ship would have a huge impact on the war.

SEPARATIST SUPPLY SHIP TECHNICAL SPECIFICATIONS

LENGTH	908.78 m (2,981 ft 6 in)
HEIGHT	910.35 m (2,986 ft 9 in)
WIDTH	1,257.32 m (4,125 ft)
CLASS	Heavy transport starship
HYPERDRIVE	Equipped
ARMAMENT	Point-defense laser cannons
COMPLEMENT	Multiple C-9979 landing craft
CREW	B1 battle droids with T-series tactical droid commander
AFFILIATION	CIS

MF_70_2ED_SFF_US.indd 1 03/06/2024 10:03

THE SEPARATIST WAR EFFORT

As the Separatist movement gained support throughout the galaxy, the Separatist Supply Ship would fulfil a vital role in Count Dooku's plans to crush the Republic. With its vast 5m-ton cargo capacity and ability to drop not only battle droids on the ground but also much-needed munitions, troops, and provisions, the ship was seen more and more across the galaxy in a variety of conflicts. Sitting high in orbit, the ship was able to defend itself to a point, but often travelled with support vessels, allowing it to focus on its primary role of supply and deployment.

HEAVY LIFTING

With a number of hangar bays embedded into its kilometer-wide hull, the Separatist Supply Ship was able not only to deploy wide-winged C-9979 landing craft, each loaded with cartridges of battle droids, but also vast amounts of ammunition and equipment necessary for the Separatist army to sustain their campaigns on the battlefield. Sitting high in orbit, it could direct traffic to the required battlefronts below, and resupply both mechanical and organic ground forces with additional weaponry, power-supply units, and more.

Within the craft's vast hangars, cranes, grappling machinery, and cargo-loading equipment swung the required ordnance into place for swift delivery. Manned by B1 battle droids and overseen by a commanding T-series tactical droid, Separatist Supply Ships ran smoothly, unencumbered by the distractions that often troubled organic crew members – and with Separatist droid foundries pumping out battle droids at a record rate, and shipyards constructing vessels around the clock, the value of the large-capacity ship soon became clear. Able to operate entirely without biological crew, and so without the need for rest or recuperation, these vessels were an ever-present and essential element in most Separatist planetary invasions.

As well as dropping battle droids of various configurations and C-9979 landing craft onto the battlefield, the ship was also capable of delivering power supplies to the front line. These independent generators gave

B1 BATTLE DROID CREW

Smartly designed on all levels, the Separatist Supply Ship could be crewed by B1 battle droids. Although commanded by a single T-series tactical droid, the battle droids were more than capable of overseeing the necessary procedures to keep the ship running smoothly.

The Separatist Supply Ship could be operated entirely by droids, with a single T-series tactical droid overseeing a crew of B1 battle droids.

MF_70_2ED_SFF_US.indd 2 03/06/2024 10:03

THE BATTLE OF UMBARA

ENDURANCE ON THE SHADOW WORLD

The Battle of Umbara was a lengthy engagement that showed off the usefulness and capabilities of the Separatist Supply Ship to its fullest. Loaned to the Umbaran military by the Confederacy of Independent Systems, the vessel was able not only to renew supply lines to the Umbaran capital and aid the Umbarans in their efforts to repel Republic forces, but also to sustain those supply lines. Launching its own droid starfighters, and backed by other combat craft and their fighters, the huge ship brushed off attempts to destroy it. Though the Separatists did not emerge as victors in that battle, the effectiveness with which they repelled the Republic fighters was noted, and the ship was used in other engagements including the blockade of Serreno and the invasion of Scipio.

Though the Battle of Umbara ended in a Republic victory, the value of the Separatist Supply Ship had been made clear, and they became widely used thereafter.

Separatist forces even more firepower and offensive options.

Armed with point-defense laser cannons, the Separatist Supply Ship was mostly able to defend itself against attack, but – as with many larger vessels and battle platforms – was susceptible to aerial assault from small one- and two-crew fighters. Because of this, Supply Ships were protected by CIS warships, which would mass to form a shield around the vessels. While potentially drawing much-needed resources away from an engagement, the benefits of protecting the ships far outweighed the deficits. After all, while presenting opponents with a vast target, the amounts of ammunition, and extra materiel held by the ships gave Separatist forces a huge advantage in the resource-sapping engagements of the Clone Wars.

In spite of this protection, Republic commanders would prioritize the destruction of the ships in any tactical decisions, especially in long drawn-out campaigns where resupply could decide a battle.

FAR AND WIDE

The Separatist Supply Ship's capacity and hyperspace capability saw it in operation right across the galaxy. While it gave great support to forces in Separatist strongholds in the Northern Dependencies, it really showed its worth on far-flung missions to the Outer Rim when Separatist and CIS support was far away.

The Supply Ship was vulnerable to attack from within, as shown when a Republic clone trooper gained entrance to one and blew it up during the Battle of Umbara.

As with most large vessels, the power core was a constant security issue. Requiring such an enormous power supply to fuel the vessel and its support craft, the power core was housed at the far end of the main hangar in the mid-section of the ship, and protected from attack by heavy ray shielding. While suitably protected from external attack, the power core was vulnerable to attacks from within, as illustrated by a three-man Republic mission to destroy a Separatist Supply Ship at the Battle of Umbara during the Clone Wars. Unable to penetrate the ray shielding with Umbaran fighters, one of the Republic clone troopers entered the reactor room through a service door and manually activated a missile pod, destroying himself and the Separatist Supply Ship. That action changed the course of the battle.

BEHIND THE SCENES

CORPORATE WAR

As the animated series *The Clone Wars* progressed, George Lucas wanted to make it clear that the battle waged across the galaxy wasn't simply fought between the Republic and the Separatists, but also by galaxy-spanning mega corporations. With the original intent being the inclusion of a *Lucrehulk*-class battleship in season four's episode *Plan of Dissent* in November 2011, Lucas and Supervising Director Dave Filoni decided to swap out the *Lucrehulk* and replace it with a new design, the Separatist Supply Ship. As Filoni explains: 'George wanted to separate the Trade Federation vessels from the Separatists, period. Because something that's really come to light in *The Clone Wars* series is that George sees it as Separatists, Republic, and then in the middle is big business. The corporations. And he felt that the doughnut ships represented too much [of] the Trade Federation from *Phantom Menace*.'

George Lucas's intention behind the Separatist Supply Ship was to show that it was not only the Trade Federation and its droid control ships that were driving the Separatist war effort during the Clone Wars.

YOUR NEXT PARTS

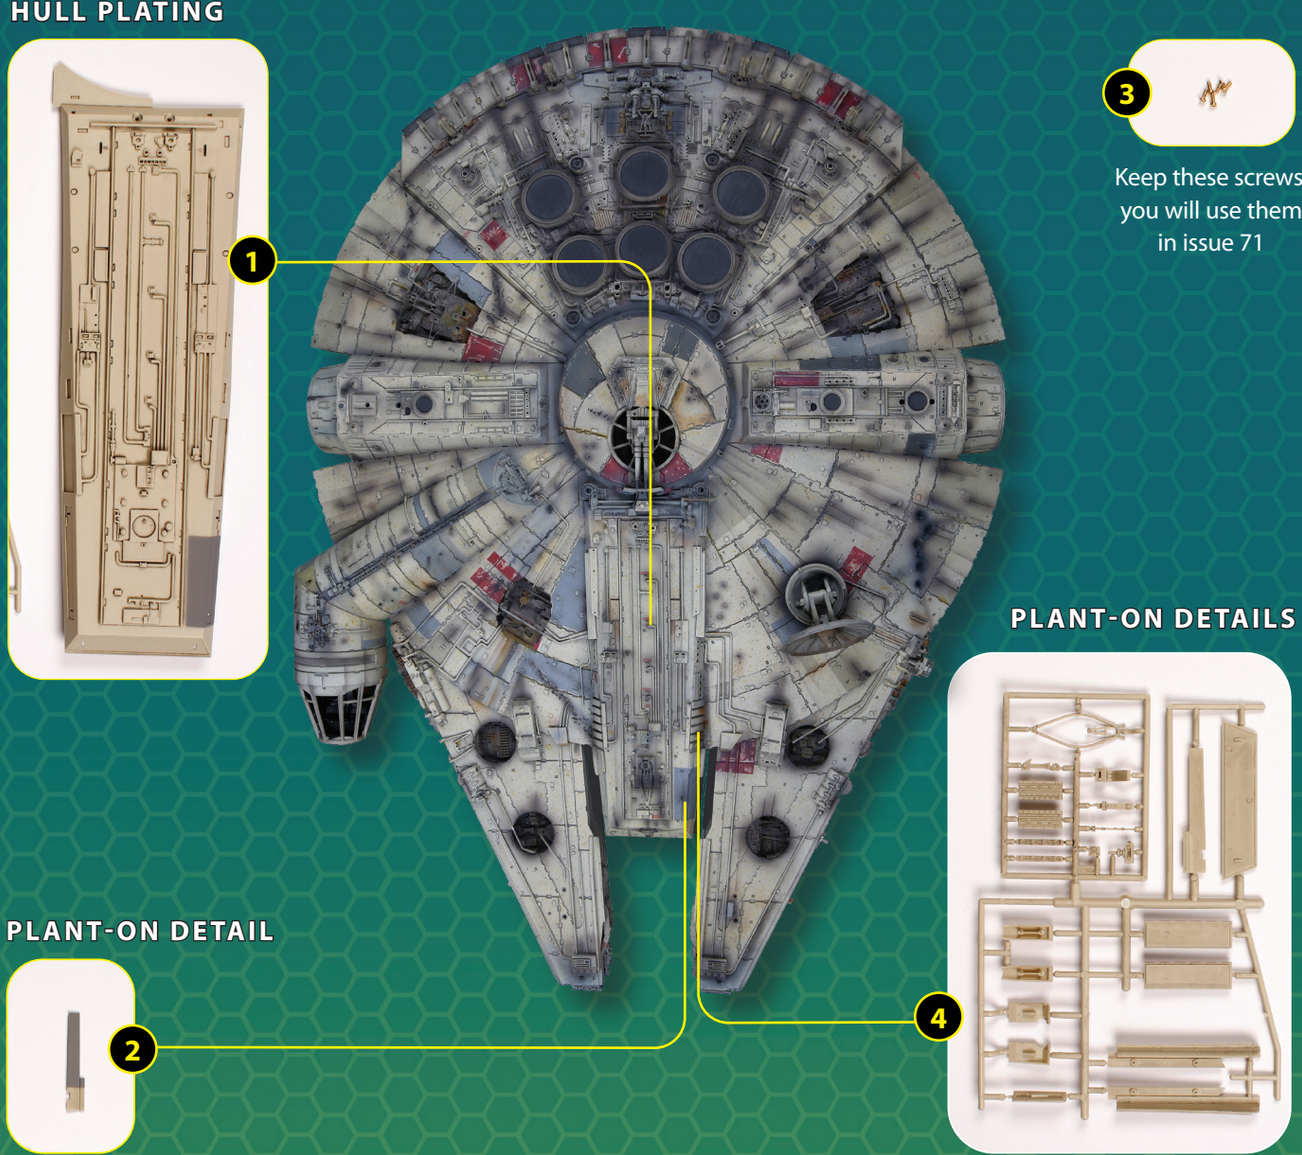

COMPONENTS CHECKLIST

1. Hull panel TP-11
2. Plant-on detail
3. Fixing screws (x 5, including spare)
4. Plant-on details (22 on sprue)

This issue's parts are all for the large piece of upper hull plating that extends forward from the dorsal turret to the mandibles. This will form part of the removable panel that covers the main cutaway over the hold.

Hull panel TP-11 is a long box-section that sits up above the main disc of the *Falcon*'s upper hull plating. In your model, it is the basis of the cover that conceals the cutaway, and in the next stage, you will join TP-11 to the rest of the removable panel and fit the magnets that hold this section in position on the hull. First, you need to complete TP-11 by adding the cluster of machinery which is provided as plant-on details.

WHERE THE PARTS FIT

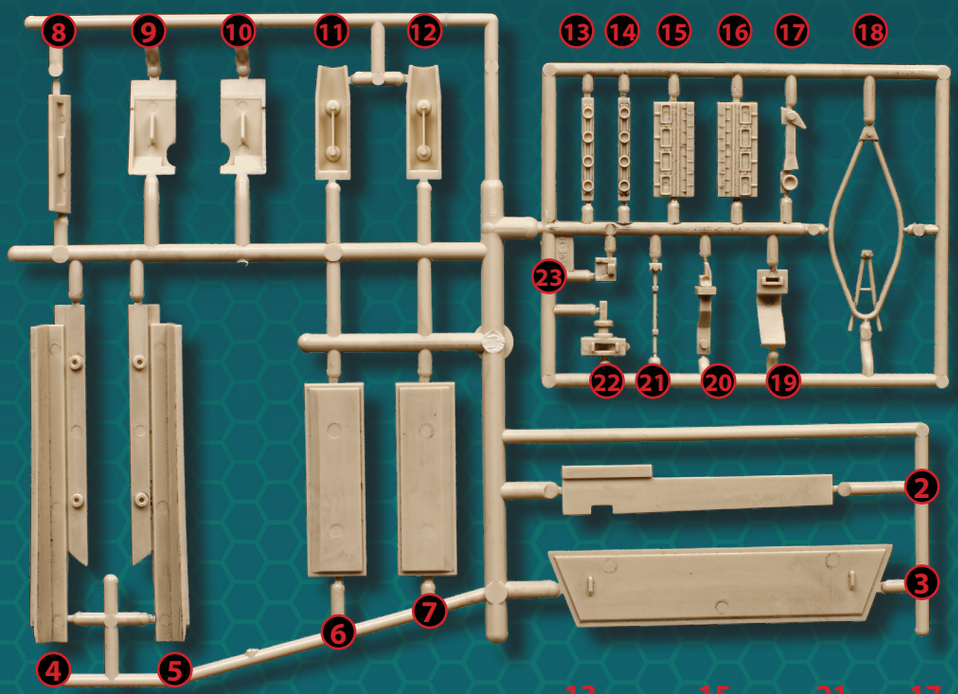

MF_70_2ED_BTF_US.indd 4 09/12/2024 11:37

ADDING PLANT-ON DETAILS

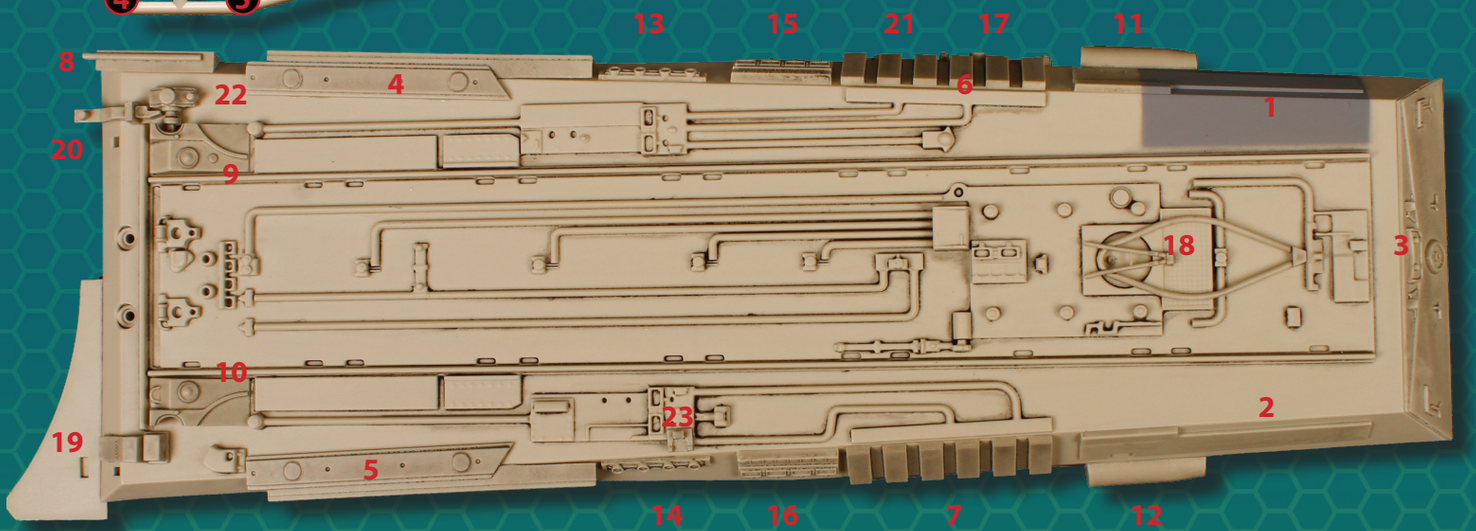

The surface of hull panel TP-11 is highly detailed and requires 23 components to be added separately, as shown in this stage.

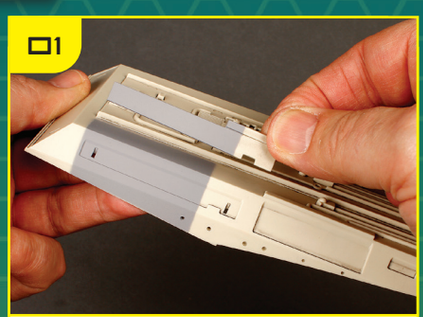

All the parts for this stage are supplied with this issue. All the details applied to TP-11 are on the sprue, except for one part provided separately.

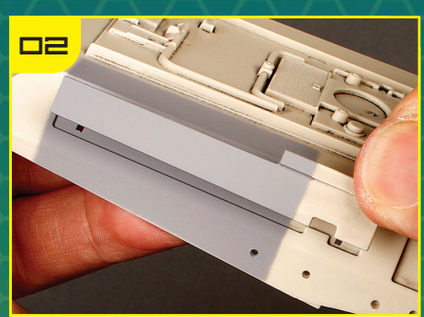

The numbers on the photographs shows where the 23 plant-on details fit onto TP-11, as shown in the step-by-step instructions.

Start with detail (1), which is the only one not provided on the sprue.

Detail (1) fits into a recess in TP-11, covering the painted detail.

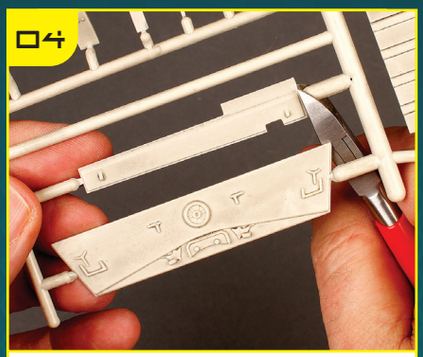

Glue (1) to the two slots in the recess in TP-11.

MF_70_2ED_BTF_US.indd 5 09/12/2024 11:37

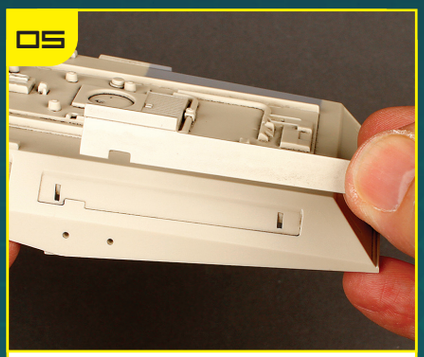

STAGE 70 ASSEMBLY

04

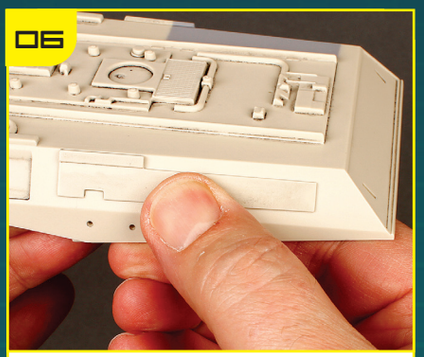

Trim each of the details off the sprue, staring with (2).

05

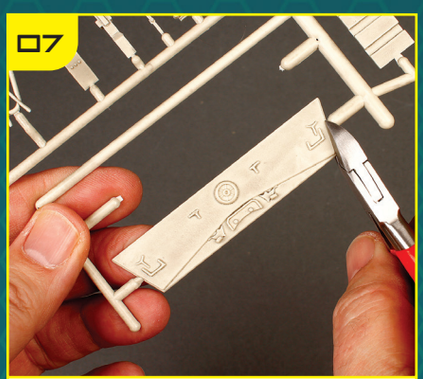

Detail (2) fits onto TP-11 as the mirror-image of (1).

06

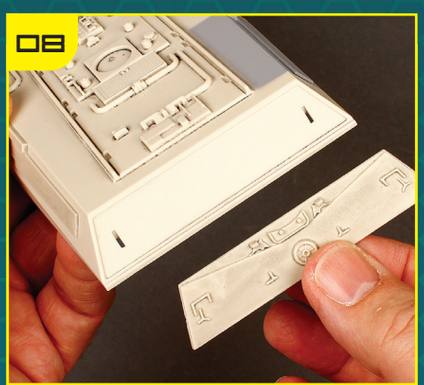

Glue (2) to the two slots in the recess in TP-11.

07

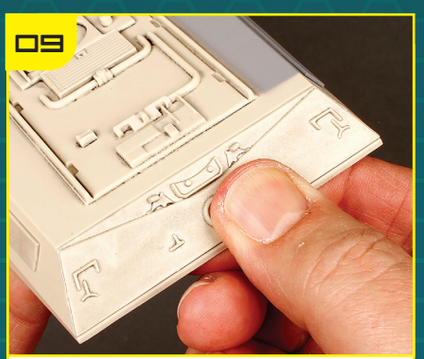

Trim detail (3) off the sprue.

08

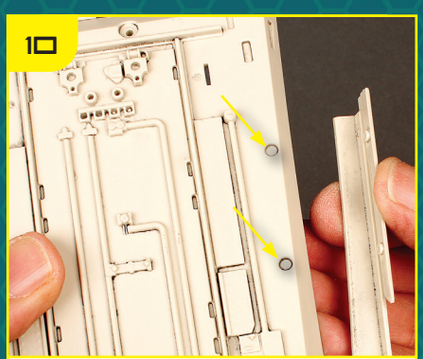

Detail (3) fits on the end of TP-11.

09

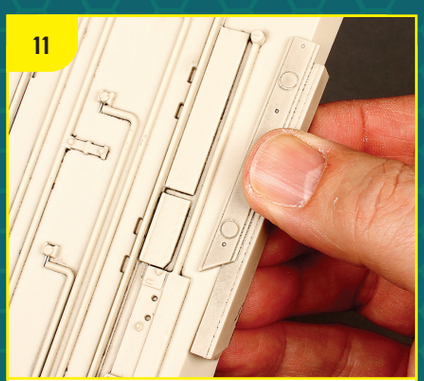

Glue detail (3) to the two slots on the end of TP-11.

10

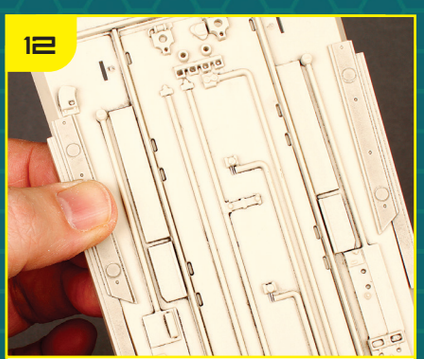

Trim detail (4) off the sprue and align the two lugs on the back with these holes.

11

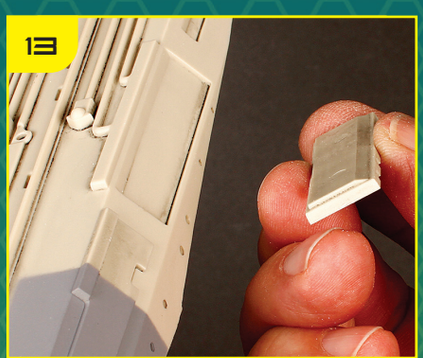

Glue (4) into the two holes.

12

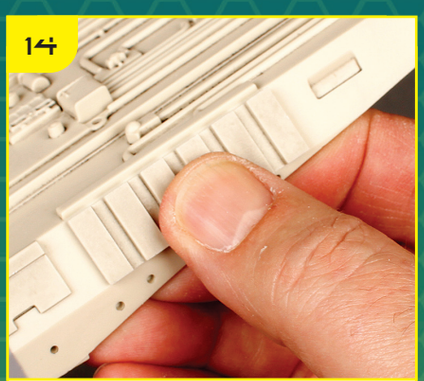

Detail (5) is a mirror-image of (4) and fits into the two opposite holes.

13

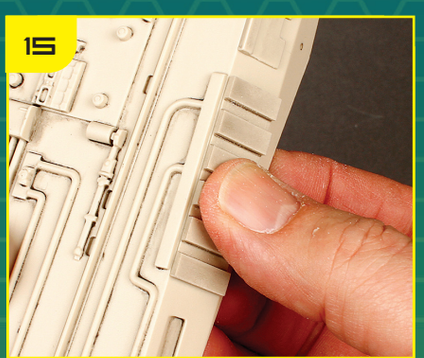

Detail (6) has a sloping upper edge that matches this recess in TP-11.

14

Glue (6) into the recess.

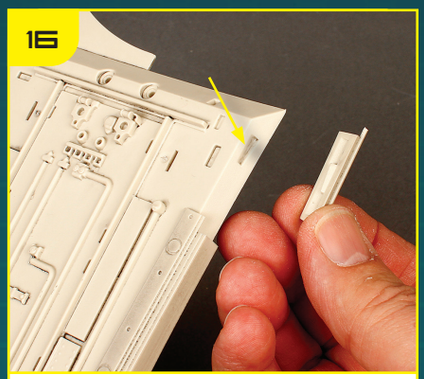

15

Detail (7) is a mirror-image of (6) and fits into a matching recess.

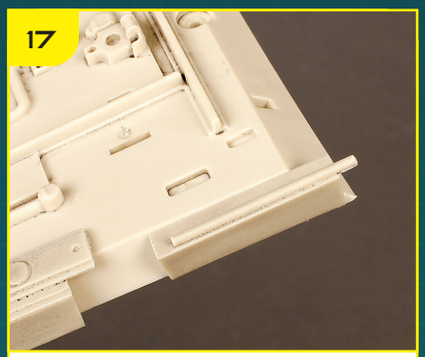

MF_70_2ED_BTF_US.indd 6 09/12/2024 11:37

16

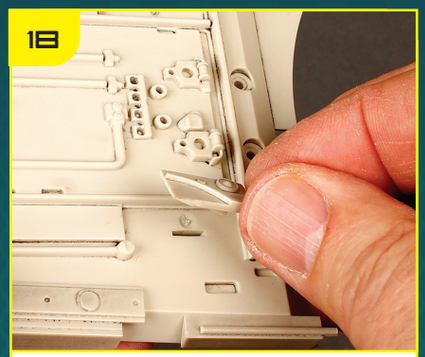

Glue detail (8) into this long slot in TP-11.

17

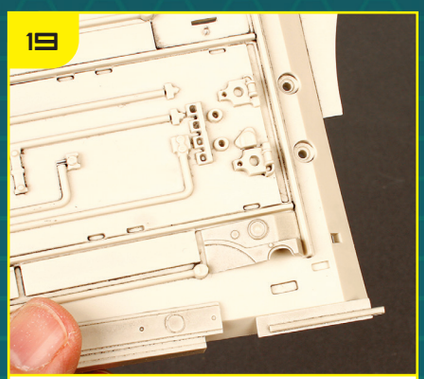

Note how the detail (8) overhangs the end of TP-11.

18

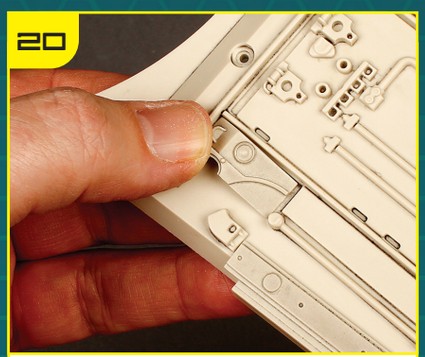

Glue detail (9) into this long slot in TP-11.

19

Detail (9) fits like this.

20

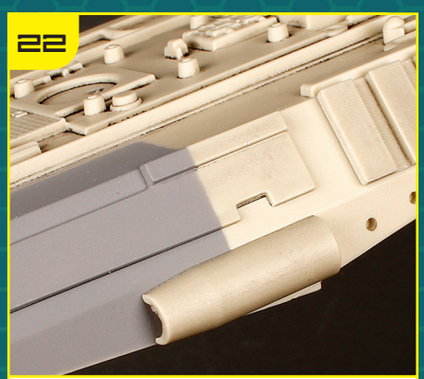

Detail (10) is a mirror-image of (9). Glue it to the slot on the opposite side.

21

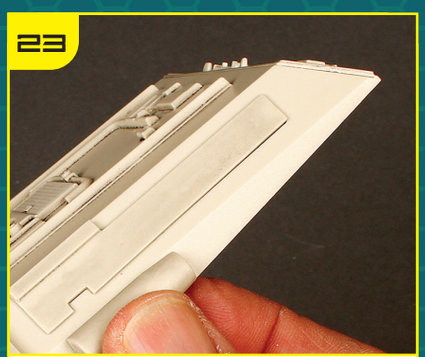

Glue (11) to these two holes in TP-11.

22

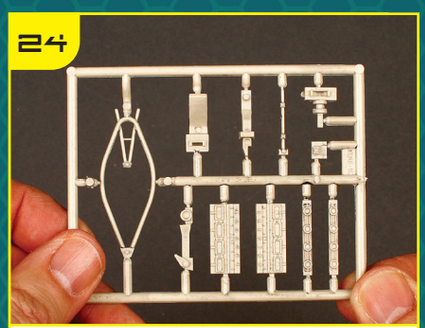

Detail (11) fits like this.

23

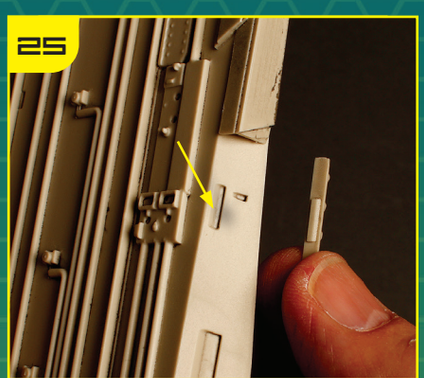

Detail (12) is a mirror-image of (11). Glue it to the holes on the opposite side.

24

You will find it easier to work with the remaining details if you cut this section off the main sprue.

25

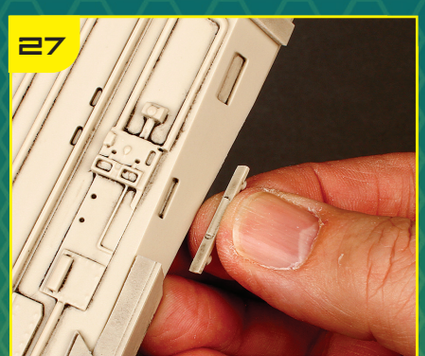

Detail (13) fits into this long slot in TP-11.

26

Glue (13) in place.

27

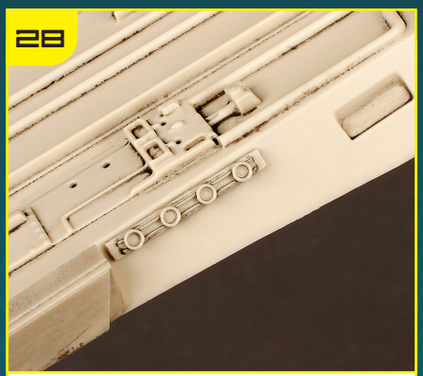

Detail (14) is a mirror-image of (13) and fits into the slot on the opposite side.

MF_70_2ED_BTF_US.indd 7 09/12/2024 11:37

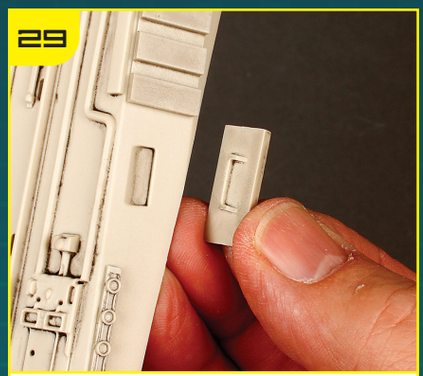

STAGE 70 ASSEMBLY

28

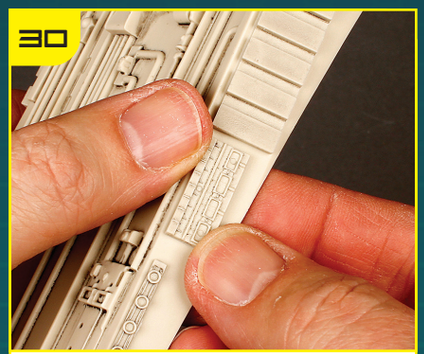

Glue (14) in place.

29

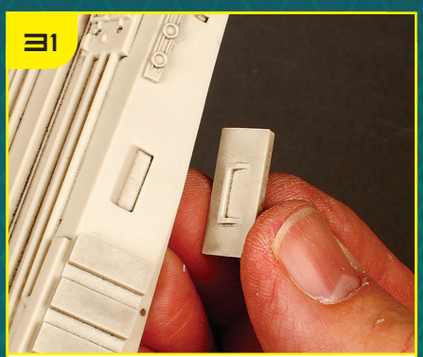

Detail (15) fits into this long slot in TP-11.

30

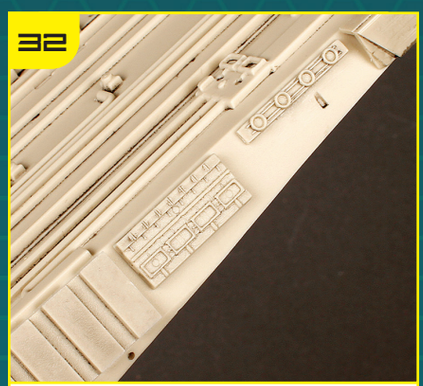

Glue (15) in place, noting which way up it goes.

31

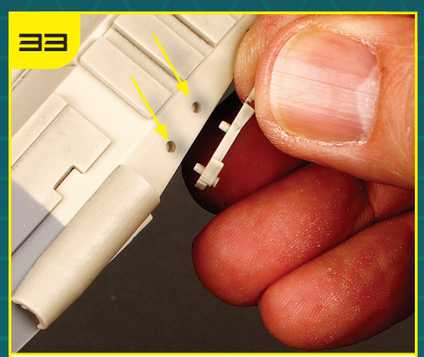

Detail (16) is a mirror-image of (15) and fits into the slot on the opposite side.

32

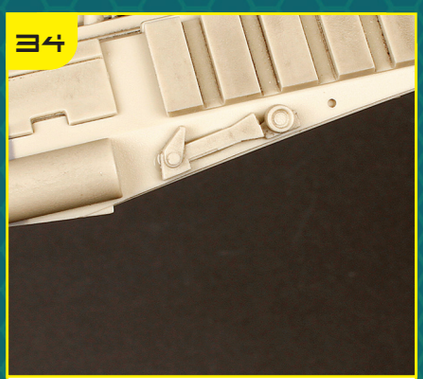

Glue (16) in place.

33

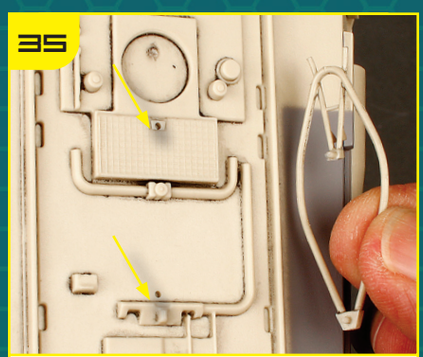

Detail (17) fits into these two holes in TP-11.

34

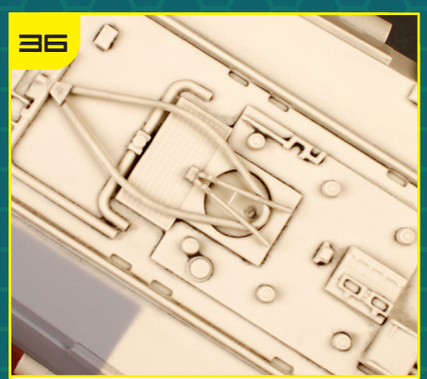

Glue (17) in place.

35

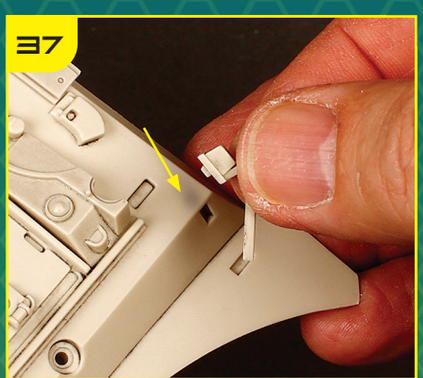

Detail (18) fits into these two holes in TP-11.

36

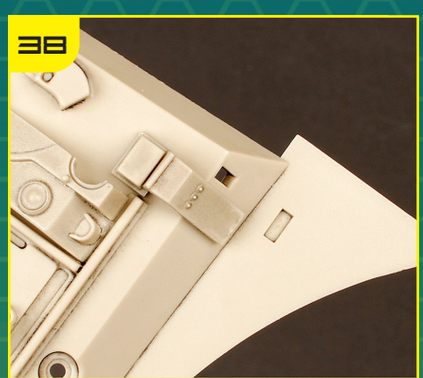

Glue (18) in place.

37

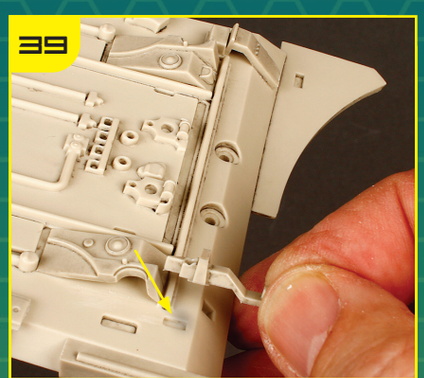

Detail (19) fits into this slot in TP-11.

38

Glue (19) to TP-11.

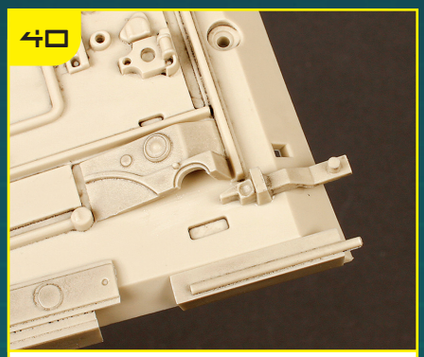

39

Detail (20) fits into this slot in TP-11.

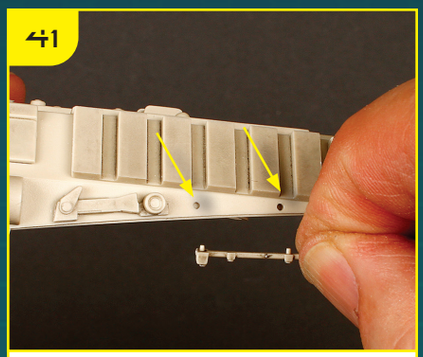

MF_70_2ED_BTF_US.indd 8 09/12/2024 11:37

40

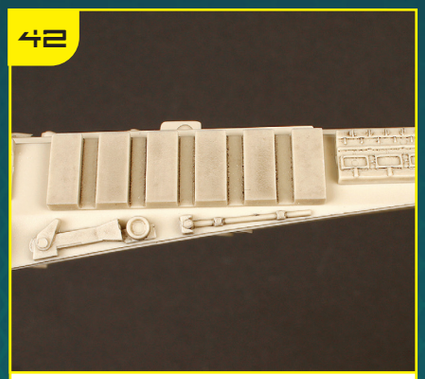

Glue (20) in place, noting how it overhangs the end of TP-11.

41

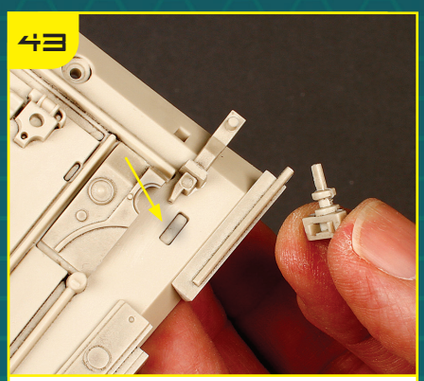

Detail (21) fits into these two holes in TP-11.

42

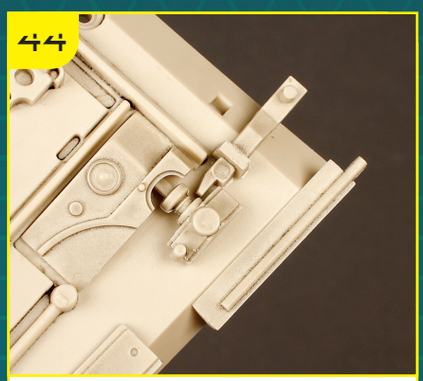

Glue (21) in place.

43

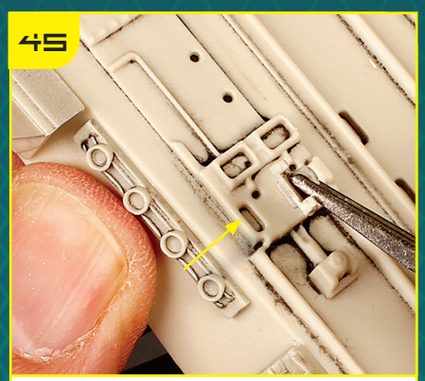

Detail (22) fits into this slot in TP-11.

44

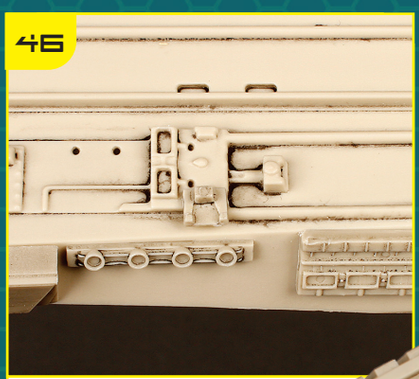

Glue (22) in place.

45

Detail (23) fits into this slot in TP-11.

46

Glue (23) in place.

That completes the assembly for this stage.
