A Monster's Roar Rips Through the Night

Night in Miami. In a corner of the city, countless cars gather, every one of them customized to tear across the asphalt at furious speed. On a night of all-out, adrenaline-fuelled racing, a Nissan Skyline GT-R (R34) draws near, glowing with blue neon light and breathing out nitrous oxide vapour as if it had a soul of its own. That Skyline GT-R is the car of Brian O'Conner, the other lead of the legendary "Fast & Furious" series.

The unbeatable sports car of the second film, "2 Fast 2 Furious" (2003), with its silver body and striking blue stripes, is a clear homage to the "AC Cobra," which took on the Chevrolet Corvette in race after race in the 1960s.

Its fierce form racing through the streets of Miami captivated "WaiSupi" fans and was etched into people's memories. Imported specially from Japan, the Nissan Skyline GT-R (R34) was tuned to be even more powerful by the "Fast & Furious" car specialists. It wears bodywork that gives the front end a true sports-car look, 19-inch HRE 446 wheels and a rear wing, and the exterior carries a flawless graphic design.

Technical Sheet

NISSAN SKYLINE GT-R (R34) "2 Fast 2 Furious"

- **Engine:** RB26DETT inline 6, DOHC 24-valve, twin turbo, intercooler with nitrous oxide injection

Now build this one-of-a-kind super model yourself!

About 20 years have passed since "Fast & Furious," the first film in the series, premiered. Build the Nissan Skyline GT-R (R34) and you too become part of the "Family." The magazine explains the assembly step by step. It also covers everything behind the huge boom some call the "WaiSupi" phenomenon: the cars' technical data, behind-the-scenes stories from the films, the spectacular car action and much more.

Now complete the 1/8 big scale model of Brian's GT-R (R34), the car that drew every eye in "2 Fast 2 Furious."

The series is complete in 110 issues.

NISSAN SKYLINE

The Nissan Skyline GT-R (R34) is one of the stars of Universal Pictures' "Fast & Furious" series, appearing in the most memorable scenes of all its car action. It is a hugely popular "thoroughbred," born in Japan for the thrill of speed and outstanding performance.

The Nissan Skyline GT-R (R34) is the sports car of the tenth-generation Skyline, launched in 1999. It is one of the cars that stand for the high level of engineering in Nissan's history.

It could hold its own against the expensive sports cars of its day, and with only small modifications its engine could be tuned for more power, which won it a wide following among car lovers.

Die-cast Body

Injection-moulded metal and ABS resin parts.
Pre-painted, so you can build right away.

GT-R (R34)

The ultimate form, all speed and muscle

Just Like the Film Car

Nitrous system, ambient lights and more: the interior matches the film car in every detail.

Many Lights on Their Own Circuits
