hachette COLLECTIONS JAPAN

©Y. Nishizaki / Yamato 2202 Prod. Committee

The legendary space battleship that saved Earth returns to space to face a new crisis——

The Yamato from the latest series, “Space Battleship Yamato 2202: Warriors of Love,” now a 1/350-scale die-cast gimmick model. Faithfully reproduced, finely crafted detail and a full set of gimmicks come together in one dynamic model, here at last!!

Weekly parts: easy to build, even for beginners!!

Just build the parts that arrive each week by following the guide: even first-time modellers can do it easily. Build all the way through and you will have completed a 950 mm Space Battleship Yamato.

Moves! Lights up! Makes sound! Packed with gimmicks!!

Moving parts, lights and sound gimmicks double Space Battleship Yamato's appeal. Buttons recreate the Wave-Motion Gun's glow, sound, main-gun movement, lights all over the hull and more!!

Building is Easy!!

Even beginners can build it with ease.

Space Battleship Yamato (First Refit)

In 2199, after her voyage to Iscandar and back, Yamato lay in an undersea dock as a memorial ship. But the Earth Federation's Wave-Motion Gun Fleet Plan returned her to the battle line: her Wave-Motion Gun was re-installed, her armour strengthened and anti-aircraft guns added.

* The series is planned to run 110 issues.

Hugely impressive die-cast gimmick model

Overall length **950mm**

1 / 350 SCALE

Issue 1 Special Bonus

See the model's appeal on the Startup DVD!!

The Startup DVD is inside the box.

www.hcj.jp/2202

Cosmo Zero, Type 100 space recon plane, Cosmo Seagull and other shipborne craft are also available as options.

The Byword for Space Battleships — Yamato.

The Yamato of “Space Battleship Yamato 2202: Warriors of Love,” from her distinctive shape to all her weapons, faithfully modeled down to

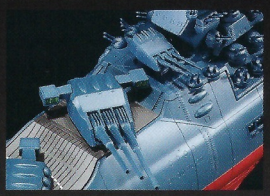

Her gallant form, setting out into space once more to save Earth, arrives as a powerful die-cast gimmick model!!

Wave-Motion Gun

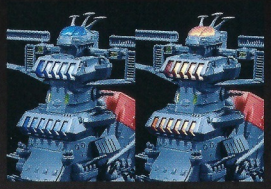

The Wave-Motion Gun, Space Battleship Yamato's signature feature, recreates the firing sequence with the rifling inside plus light and sound gimmicks.

48 cm & 20 cm Triple Positron Shock Cannon Turrets

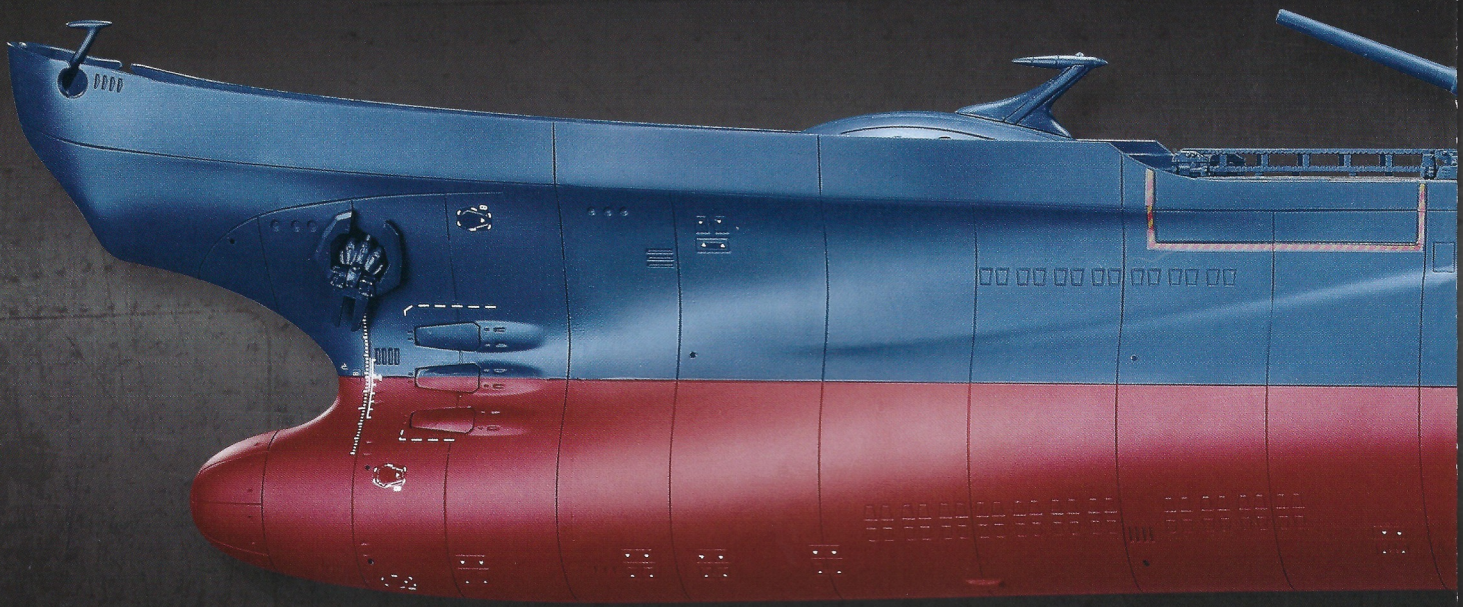

With the dedicated controller, the 3 main and 2 secondary turrets rotate left and right and each barrel elevates. Don't miss the firing sound, just as on screen.

Bridge

From the captain's cabin to the second bridge, plus antennas and weapons all over, every detail is shaped true to the design. The lights glow normal blue, and battle orange too.

Bow Torpedo Tubes

The bow torpedo tubes have an opening hatch gimmick. With the hatches open, you can see the torpedoes loaded inside. Note details such as the launch-smoke vents.

Carrier Planes

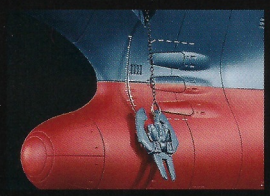

Includes the Cosmo Tiger II, the Type 1 space fighter-attacker that played a key part in Yamato's air defense. Small, yet detailed. Other carrier planes are offered as options.

Hangar

The hangar that houses the Cosmo Tiger II carrier planes has its distinctive ring shape, densely detailed. The included Cosmo Tiger IIs stow inside, just as on screen.

Rocket Anchor

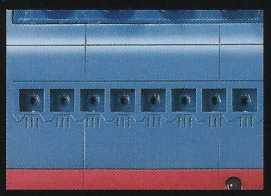

The rocket anchor is die-cast and its chain is a metallic material, for a weighty finish. It also retracts by motor.

Hull-Side Observation Room

The observation room on the hull side amidships uses clear parts. LEDs inside recreate its look in the show.

Torpedo Tubes

The torpedo tubes below the anti-air pulse laser guns are opened for firing by a motorized shutter gimmick.

The A.D. 2202 refit, faithfully recreated

the very last detail.

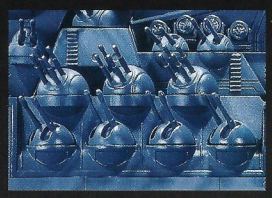

Check out the many gimmicks!!

Icon Key

Dedicated controller runs the motorized gimmicks

- AUTO Automatic gimmick
- Light gimmick
- Sound gimmick
- Manual gimmick

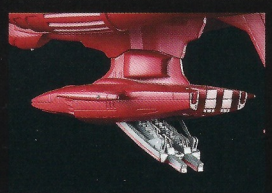

AA Pulse Laser Turrets

The anti-air pulse laser turrets amidships reproduce their unique hemispherical shape. Using the controller, the upper and lower pulse laser guns move.

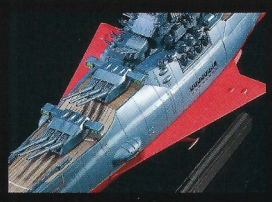

Length ~ 950mm

Third Bridge

The third bridge on Yamato's underside also has its distinctive shape faithfully recreated to the design. The boarding hatch beneath opens and closes by motor and lights up.

Wings

The wings, deployed for flight within the atmosphere, attach to and detach from the hull with built-in magnets. Display them deployed or stowed.

Lower Hatch

The lower hatch, opened to launch carrier planes and more, also opens and closes. Details such as its inner face are reproduced.

true to the design!!

Space Battleship Yamato (First Refit) Specs

Type	Super-dreadnought space battleship
Project	A201F5-E
Hull no.	BBY-01
Length	333 m
Main engine	Ro-type Kanpon I wave-motion boiler ×1 (Wave-Motion Engine)
Sub-engine	Kanpon modified cosmo turbine ×8, 2 shafts
Gun armament	Dimensional wave-motion implosion projector
	(200 cm caliber, aka Wave-Motion Gun) / (bow)
	48 cm triple positron shock cannon turret ×3
	20 cm triple positron shock cannon turret ×2
	Torpedo tubes ×12 / (bow and stern, both sides)
	Torpedo tubes ×16 / (both sides)
	8-cell missile launcher tower ×1 / (aft of bridge)
	Type 94 depth-charge launcher ×2 / (mast base, both sides)
	Missile launcher ×10 / (hull bottom)
	Numerous AA pulse laser turrets / (both sides)

8-Cell Missile Tower

The 8-cell missile launcher tower is faithfully modeled to the design, with its unique shape and the hatch details of its top launch ports. The searchlights at its base light up.

www.hcj.jp/2202

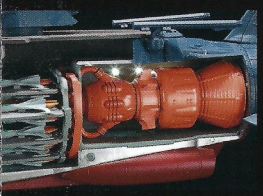

×1.6

The finished model is actually 1.6 times the size in this photo!

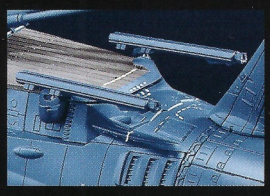

* This series is complete in 110 issues.
* The actual product may differ from the photos.
* Specifications may change without notice for product improvement.

Wave-Motion Engine Interior

The left-side armor is removable, so you can see the Wave-Motion Engine machinery inside. The flywheel turns independently by hand.

Catapult

The catapults used to launch carrier planes are movable, and their unique shape and details are reproduced.

Wave-Motion Engine

The Wave-Motion Engine and auxiliary engines are faithfully recreated from the design. Light and sound, run from the controller, stage the launch scene.

Light, Motion & Sound Gimmicks on Board!!

Light-up gimmicks in the Wave-Motion Gun, Wave-Motion Engine, bridge and more.
With the moving and sound gimmicks, you can recreate many famous scenes for real.

Wave-Motion Gun Firing Scene!!

The Wave-Motion Gun firing sequence, recreated in light and sound!!

Wave-Motion Engine Light & Sound

Wave-Motion Engine thrust in light and sound, just like the launch on screen

Lights Throughout the Hull

Hull floodlights, anti-collision lights, searchlights, tail lights and more light up all over the hull, recreating the look from the show.

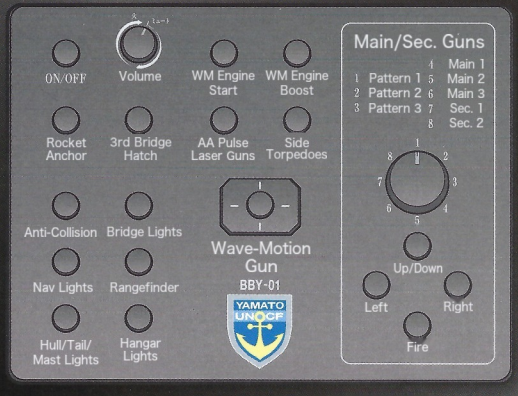

Turret Motion & Gunfire

Main turrets 1-3 and secondary turrets 1-2 rotate and their barrels elevate, with the gunfire sounds from the show.

One Controller Runs Every Gimmick

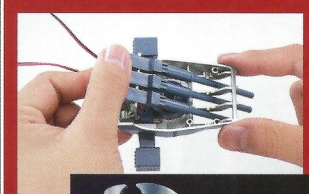

Operate each gimmick with the dedicated controller. With all these gimmicks that light up, move and make sound, you can keep enjoying Space Battleship Yamato after it is built.

* Specifications and design are subject to change.

Issue 1 Special Bonus

Get to Know the Model on the Startup DVD!!

The Startup DVD is inside the box.

Facing the new threat of Gatlantis and bearing Earth's fate,

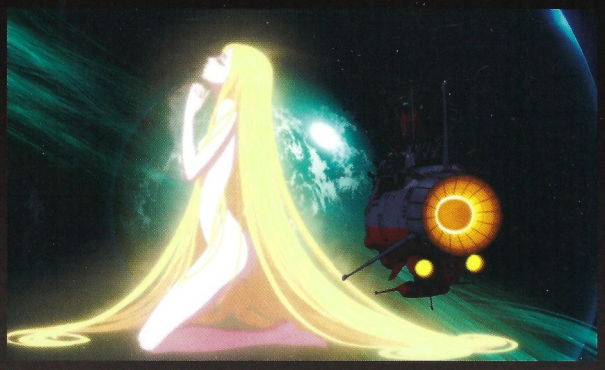

Guided by Teresa, Yamato heads for the planet Telezart. But Gatlantis, and then Dessler, stand in its way.

Three years after Yamato's voyage to Iscandar, in the year 2202, Earth had signed a peace treaty even with the Garmillas Empire and was on the road to recovery. Behind the scenes, however, it was building up its military under the "Wave-Motion Gun Fleet Plan."

In space, Gatlantis invaded the planet Telezart. Learning that Teresa had sent a Cosmo Wave to Earth, Zordar turned the White Comet toward Earth. Kodai and the other former Yamato crew who received Teresa's message launched the ship for Telezart in what amounted to a mutiny.

After battling Gatlantis, Yamato reached Telezart and met Teresa. But there, Dessler made his appearance.

This series remakes the film "Farewell to Space Battleship Yamato: Warriors of Love" (1978) and the TV series "Space Battleship Yamato 2" (1978-1979). Its carefully built setting, from the dark side of the rebuilt Earth to the inner workings of the Garmillas Empire and the true nature of Gatlantis, gives its world real depth. Also worth noting is how carefully each character's feelings are portrayed.

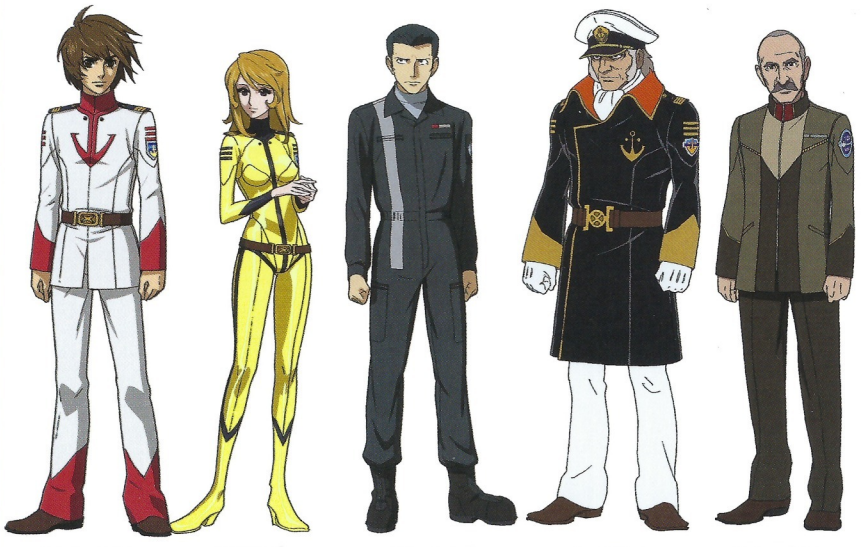

Earth

With the Cosmo Reverse System that Yamato brought back, Earth has regained its former appearance. The Earth Federation has been founded and is on the road to recovery, but behind the scenes it is pushing the Wave-Motion Gun Fleet Plan and building up its military.

Character

Susumu Kodai | Yuki Mori | Shiro Sanada | Ryu Hijikata | Heikuro Todo

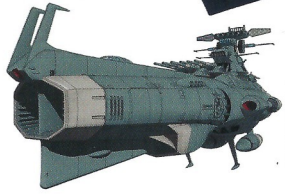

Mechanic

BBY-01 Yamato-class Lead Ship Yamato (First Refit)

Forward-Armed Space Warship AAA-1 Andromeda

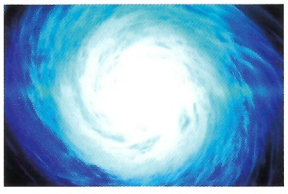

Mass-Produced High-Capability Weapons System D1 Forward Space Warship Dreadnought

Yamato sets out into space once more——.

Gatlantis

A warrior nation led by Zordar. In truth, its people are artificial life forms created by a certain civilization. After occupying Telezart, it learns that the Cosmo Wave sent by Teresa was headed for Earth, and begins its invasion.

Character

Zordar

Sabera

Baruze

Gairen

Goland

Mechanic

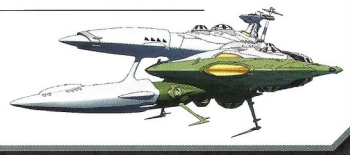

Medalusa-class Heavy Battleship

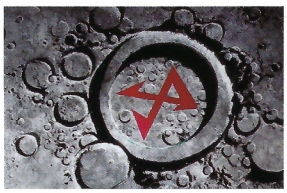

Gaizengan Weapons Group:
Calaklum-class Warship

Lascaux-class Assault Cruiser

Garmillas

It has signed a peace treaty with Earth, but is in turmoil at home. The return of the missing Dessler, however, brings a change in the situation.

Character

Loren Burrel

Klaus Keyman

Abelt Dessler

Mechanic

Neu Deusular

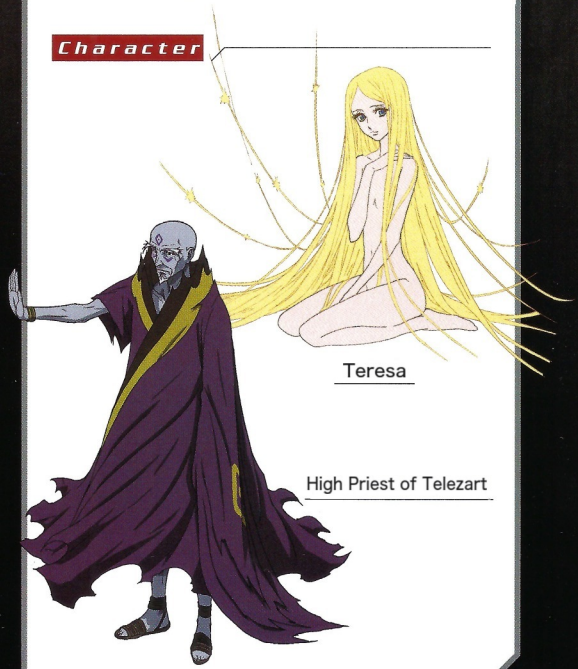

Space Dogfighter DWG262
Tsvarke (for Embassy Staff)

Telezart

A planet said in legend to have once reached the height of civilization. Occupied by Gatlantis, it is the site of work to seal away Teresa's powers.

Character

Teresa

High Priest of Telezart

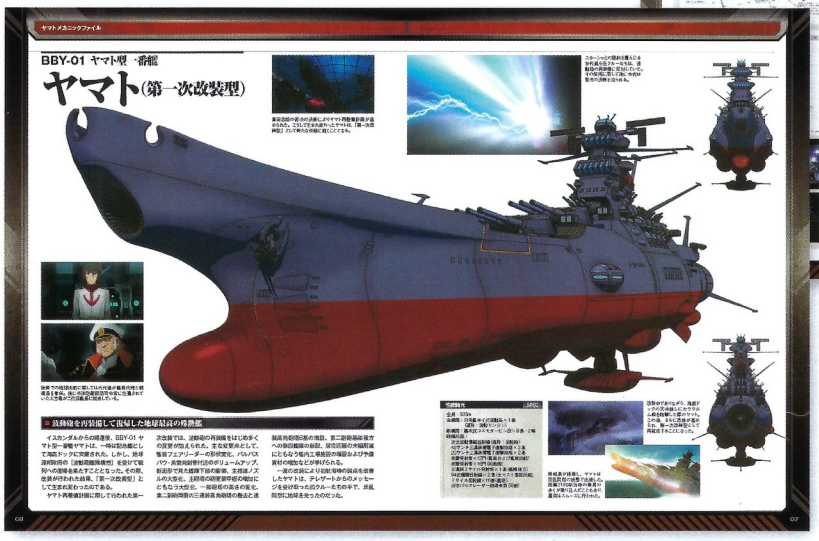

All of “Space Battleship Yamato 2202: Warriors of Love”

Each issue's magazine is made up of four chapters. Making full use of design material and visuals from “Space Battleship Yamato 2202: Warriors of Love”, it explains in depth the mechanics, starting with Yamato, plus the characters, the story and the merchandise.

Yamato Mechanic File

Yamato explained in full, with a wealth of material

Using a wealth of design material, we explain every part of Yamato in depth, from her armament, such as the Wave-Motion Gun and the 48 cm triple positron shock cannon turrets, to the bridge and the Wave-Motion Engine. We also cover her internal structure and how she is used in the story, looking closely at Yamato's construction and gimmicks. By touching on the full refit plan and her battle record, we examine Yamato from every angle. Carrier craft and mechanics such as the Cosmo Tiger I, Cosmo Tiger II and Type 2 Mobile Space Armor are explained the same way.

Spacecraft File

Earth, Gatlantis, Garmillas and more: the ships and mechanics of every faction

We introduce the ships and mechanics of the Earth Defense Force, Gatlantis, Garmillas and more. As in the “Yamato Mechanic File”, a wealth of design art is used to explain each faction's ships, from their design trends and deployment to their battle records.

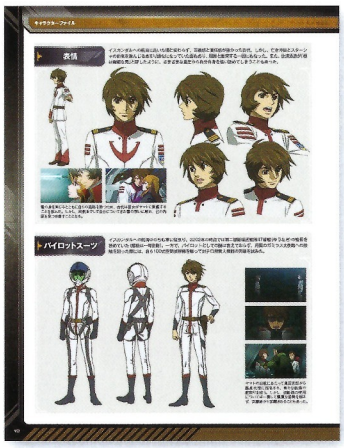

is right here!! Packed magazine contents!!

Character File

Earth, Gatlantis, Garmillas: every faction's characters

From Susumu Kodai, Yuki Mori, Daisuke Shima, Shiro Sanada and the rest of Yamato's crew on Earth's side, to Zordar, Sabera and Baruze of Gatlantis, Dessler, Keyman and Loren of Garmillas, and Teresa of Telezart, the characters of every faction are fully covered. From main characters to guest characters, reference material explains what they do in the story.

Extra File

Story, merchandise and more: a wide range of topics

The Extra File spotlights the story, the merchandise and more. Each episode is explained in detail with stills and dialogue, and columns dig deeper into key points. On the merchandise side, we introduce all kinds of Yamato items, from plastic kits and figures to apparel. Everything to do with Yamato is here.

Assembly Guide

Assembly shown step by step in 3D renders and photos

We explain in detail how to assemble the Space Battleship Yamato parts that come with every issue. Besides a parts checklist, each guide shows the assembly steps in 3DCG and photos, so even first-time modelers can finish the model easily and reliably.

Free gifts for everyone who subscribes!

Gift 1 Special Parts Box + 3 Carrier Aircraft Set

Special Parts Box

▶ A storage box made specially for this series, to keep the parts you build each issue and the parts you set aside. A must-have for first-time builders. With it, you join the crew of Yamato's Engineering Dept. (Size: 20 cm L × 30 cm W × 6 cm H)

3 Carrier Aircraft

◀ Not sold anywhere else: 3 carrier aircraft at the same scale as the battleship Yamato and Cosmo Tiger II.

- Cosmo Tiger I
- Cosmo Tiger II (3-seat type, torpedo bomber)
- Blackbird (Kato's plane)

Gift 2 Yamato Crew ID Card + Spec Plate Set

Spec Plate

▶ An original nameplate with Yamato's specifications engraved on metal.

You can attach your own photo

Your name is printed on it!

Yamato Crew ID Card

◀ Great in a pass case or a neck-strap ID holder. Now you too are appointed Yamato's Tactical Chief.

For Premium Subscribers!

Add ¥250/issue (tax incl.) from Issue 4
Ships with the final issue! * No mid-term refunds.

An original display case to show off your finished Space Battleship Yamato beautifully. The cover is a luxurious glass-look acrylic, clear yet strong. With its solid wooden base, it keeps your finished model looking beautiful for years. (Size: 44.5 cm H × 115 cm W × 36 cm D)
